

**Λειτουργικά Συστήματα (HY321)**  
**Εργασία 1 - Εαρινό 2017**

Ομάδα	ΑΕΜ	Βαθμός	Σχόλια
1	1724	93.2	Not using the real_parent. No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper. Did not insert the prefix of teamxx to functions
1	1745	93.2	
1	1832	93.2	
2	1382	99.7	No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper
2	2052	99.7	
2	2001	99.7	
3	2012	99.85	Did not insert ifndef def protection to lib wrapper
3	2020	99.85	
3	2029	99.85	
4	1964	95.2	Not using the real_parent. No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper.
4	2041	95.2	
4	2075	95.2	
5	2034	96.8545	Did not insert ifndef def protection to lib wrapper. Included in patch extra custom syscall
5	1994	96.8545	
5	1946	96.8545	
6	1720	99.7	No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper.
6	1882	99.7	
6	1914	99.7	
7	1985	95.2	Not using the real_parent. No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper.
7	1950	95.2	
7	1339	95.2	
8	1852	95.5	Not using the real_parent.
8	1973	95.5	
9	1798	99.55	No makefile present. However, detailed instructions to compile the source-files were provided. Used directly the number of syscall and not the generated define.
9	1844	99.55	
9	1814	99.55	
10	1725	89.488	Not using the real_parent. No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper. In patch include custom test call so find_roots assigned to 354. Included compiled object to final tar
10	1803	89.488	
10	1845	89.488	
11	1932	99.7	No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper.
11	1960	99.7	
11	1965	99.7	
12	1574	83.95	Loop executes while current->pid!=NULL. Not using real_parent. Wrong filename. No makefile present. However, detailed instructions to compile the source-files were provided. Did not insert ifndef def protection to lib wrapper
12	1693	83.95
