

Practical Activity: Creating Strong Passwords

Learn how to create strong passwords that are difficult to guess and provide an additional layer of security to your online accounts.

Practical Activity: Scanning a Computer with Antivirus Software

Introduction to Antivirus Software

Antivirus software is a program designed to detect and remove viruses and other malware from your computer. It is important to have antivirus software installed on your computer to protect yourself from cyber threats.

Choosing an Antivirus Program

There are many free and paid antivirus programs available on the market. It is important to choose a program that is reliable and regularly updated to ensure maximum protection for your computer.

Scanning your Computer

To scan your computer for viruses and malware, you need to open your antivirus program and choose the option to perform a full system scan. This process may take some time depending on the size of your hard drive.
